The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/566,733	Applicant(s) MAENISHI ET AL.	
	Examiner IMRAN AKRAM	Art Unit 1795	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1 is Embodiment 1;

Species 2 is Embodiment 1, First Alternative;

Species 3 is Embodiment 1, Second Alternative;

Species 4 is Embodiment 2;

Species 5 is Embodiment 3; and

Species 6 is Embodiment 4.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1795

2. The claims are deemed to correspond to the species listed above in the following manner:

Species 1 is claims 1-13, 16, and 22;

Species 2 is claims 1, 14, and 15;

Species 3 is claims 1, 16, and 17;

Species 4 is claims 1 and 18-21;

Species 5 is claims 1 and 22-28; and

Species 6 is claims 1 and 29.

The following claim(s) are generic: 1, 16, and 22.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The corresponding technical features of the species groups are those of claim 1. Asou (US 2004/0043262 A1) discloses all these features and so they are consequently not special.

4. Asou discloses a hydrogen generator comprising: a first tubular wall element **21**; a second tubular wall element (not labeled, outer shell of reactor) disposed outside said first tubular wall element and coaxially with said first tubular wall element (see figure 1); a tubular water evaporator **18** provided in a tubular space formed between said first and second tubular wall elements; a tubular reforming catalyst body **10** provided in the tubular space, said water evaporator and the reforming catalyst body being arranged in an axial direction of said first and second tubular wall elements (see figure 1); a water inlet **20** from which water is supplied to said water evaporator (paragraph 35); and a

Art Unit: 1795

feed gas inlet **19** from which a feed gas is supplied to said water evaporator; wherein said hydrogen generator is configured to cause a gas mixture containing steam and the feed gas to flow from said water evaporator to said reforming catalyst body and to reform the gas mixture into a reformed gas containing hydrogen (paragraph 41).

5. A telephone call was made to James Ledbetter on 5/5/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
